DETAILED ACTION

Double Patenting

Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,665,234. Although the conflicting claims are not identical, they are not patentably distinct from each other because they each claim the method of providing a recommended plurality of audio signals and recording the audio signals and the method of halting acoustical play of a preferred plurality of audio signals in some combination. It would have been obvious to one of ordinary skill in the art at the time of invention to claim the obvious subcombination recommendation feature of the combination vehicle sound system claimed in the prior patent.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohmura et al, US Patent Application Publication 2001/0048749; Drosset et al, US Patent 6,662,231; Seto et al, US Patent Application Publication 2002/0041692; Gioscia et al, US Patent 6,407,750..
